Technical Data Sheet

Filamenton SPECIAL PLAHT

Physical properties

| Property | Typical value |
|---------------------|------------------------|
| Density | 1,22 g/cm ³ |
| Diameter | 1,75/2,85 mm |
| Diameter tolerance | ± 0,05 mm |
| Roundness tolerance | ± 5 % |

Thermal properties

| Property | Test method | Typical value |
|-----------------------------|-----------------------|---------------|
| Vicat softening temperature | ASTM E2092 (0,45 MPa) | 75-100°C |

Mechanical properies

| Property | Test method | Typical value |
|---------------------|-------------|---------------|
| Tensile stress | ASTM D 638 | 2450 MPa |
| Tensile strength | ASTM D 638 | 32 MPa |
| Elongation at break | ASTM D 638 | 100 % |

Recommended printing conditions

| Property | Typical value |
|------------------------------|----------------|
| Printing temperature | 195-225°C |
| Buildplate temperature | 50-70°C |
| Printing speed | 50 mm/sec |
| Heat treatment (100% infill) | 110°C – 15 min |

Packaging

| Property | Typical value |
|--------------------|-----------------------------------|
| Coil size (D x H) | 200x65 mm |
| Net weight | 1000 g |
| Length per kg | 330 m (1,75 mm) / 130 m (2,85 mm) |
| Coil core diameter | 52 mm |

Plastics degrade and lose their properties over time. We recommend using the purchased roll within 12 months of opening the outer packaging. Store the material in a cool, dry, and dark place to maintain its quality. Avoid direct contact with the molten product, as it can cause severe burns—take appropriate safety measures. When the material is heated above its melting point, vapors may be released, so ensure proper ventilation. Avoid overheating the material. The provided information has been compiled to the best of our knowledge and understanding. The technical data are typically based on sample values and are not guaranteed characteristics. They may be subject to change as products are developed.
